**Report on**  
**“Tree Maintenance Day”**

**Event Name:** Tree Maintenance Day

**Date:** 21/05/2026

**Venue:** College Campus

The Green Club of the College organized **Tree Maintenance Day** on **21/05/2026 at 3:30 PM** in the college campus. The activity was conducted with the objective of promoting environmental responsibility among students and emphasizing the importance of nurturing and maintaining trees for a healthier and greener environment. The initiative also aimed to prepare the campus greenery for the upcoming monsoon season and enhance the resilience of trees to changing climatic conditions.

The activity witnessed enthusiastic participation from Green Club members along with students from other classes. Students actively volunteered in the maintenance of trees and surrounding green areas, demonstrating their commitment towards environmental conservation. The event highlighted that planting trees is only the first step, while their regular care and maintenance are equally essential for their healthy growth and long-term survival.

During the activity, students thoroughly cleaned the area surrounding the base of the trees by removing dried leaves, weeds, and unwanted vegetation. The soil around the trees was loosened and properly shaped to facilitate better water retention during the rainy season. Organic fertilizers were applied to improve soil fertility and provide essential nutrients required for healthy plant growth. These maintenance practices were carried out to strengthen the trees and create favorable conditions for their sustainable development.

Special attention was given to preparing the trees for the approaching monsoon season by ensuring proper water retention around the roots and maintaining clean surroundings. The activity also emphasized the significance of regular tree maintenance in improving the health of trees, conserving biodiversity, reducing soil erosion, and mitigating the adverse effects of climate change. Students learned that proper care of existing trees is as important as planting new ones for maintaining ecological balance.

The initiative served as a valuable learning experience by instilling a sense of environmental stewardship, teamwork, and social responsibility among the participants. It encouraged students to adopt similar tree care and maintenance practices in their homes and local communities and reinforced the importance of collective efforts in preserving nature for future generations.

The activity was successfully organized by the Green Club under the coordination of Ms. Ankita Javalkar, under the valuable guidance of Principal Dr. Rajashree Chavan.
